INTRODUCTION

Welcome to NFL Quarterback Club™ '98. This is the real thing. As a proud member of the NFL Quarterback Club, I am happy to say that this is the one game that puts the feel of real football in your hands. It's got all the play-making, all the strategy, and all the crunching intensity of a real NFL game. Authenticity makes all the difference, so I personally selected all of the offensive plays and actually drew up a few of my own favorites.

Whether you are guiding your team through the grind of a full Season schedule, dropping back in the pocket to stake your claim in the Playoffs, or going for the Big Ring in the Super Bowl, you've got all the action that makes football great! Playing great Historical Simulations is a challenge for any QB, and situations don't come tougher than the ones you create yourself with Custom Simulations! And I love features like Create a Player that let me design custom players and place them on Created Teams that really get the job done.

There's lots to do off the field, too! Front-office moves like drafting and trading players (watch that salary cap!) make all the difference between a winning club and one that has January off!

I hope you enjoy playing NFL Quarterback Club™ '98 as much as I do. See you on the field!

COACHING TIPS & HINTS

1. Follow the play diagrams, especially on running plays. If you don't follow the pattern, you're liable to run smack into a defender— big trouble!
2. Take some time to master the controls for different play situations. Advanced players know that a juke or a spin or some timely turbo can make the difference between the goal line and a 4th down punt!
3. Become familiar with your entire roster. If a crucial player is injured, will you have a replacement in mind? Can you pick up a free agent replacement?
4. Watch the salary cap! Too much high-priced marquee talent can leave you with mediocre players at key positions. Look closely at the stats to identify quality players that others overlook.
5. Make use of Audibles. When the clock is ticking and you find that your opponent has set up perfectly to ruin your down, sticking to the playbook won't put you in the history book. Take some time to master your Hyper Audibles and you'll gain an advantage.
